## ABOUT US

Imagino Solutions Pvt. Ltd. is a web designing and development company based in Kerala, India. The company aims at taking imagination to a new level where great user experience is delivered and brand engagement further strengthened.

Having started in 2015, the company now has a diverse portfolio of websites and web development projects with clientele from India, USA, UK, Dubai and Australia among others. Having experience in web development, web designing and mobile development, our team is committed to take up any level of web development projects as per customer requirement.

The two lines on the company logo represent 'happy employees' and 'happy clients' respectively. Happy employees form the crux of our workspace culture and we strongly believe they lead to satisfied customers. Our employees work in an environment where they are able to manage work and life effortlessly.

Team Imagino comprise of experienced designers and developers, setting new standards in designing and developing. As a highly motivated team, we follow efficient and flexible guidelines to suit individual needs of the client, making our service unique and unconventional.

## 24 \* 7 SUPPORT

Imagino provides the customer with best support options so that they can know the exact status of their project and actively take part in making the project a success. Our client portal provides the clients access to their projects, contracts, services and account so as to improve transparency. Besides, it streamlines the process of collecting source documents from clients, organise client data and secures sharing files with staff and clients.

Ticketing 24 \* 7

## CLIENT PORTAL

Imagino Project Management Tool

For clients, it is quite difficult to keep track of the status updates and deliverables sent by agencies. No matter how fast you update them, there are chances that these files lie unopened in their inboxes. Digging this out whenever the need arises can be quite a challenge. This is where the role of a client portal comes in. Imagino provides our customers with an organised client portal that helps them monitor the status of their projects as well as access to all files at any time.
